

# NEW FOOTBALL MACHINE

Thousands of reps of  
punts, kick-offs, pass reception and  
coverage at every practice

**AERIAL  
ATTACK**™

Introducing the **NEW** Aerial Attack Football machine designed for football programs on a tight budget. This unit will deliver right-footed deep spiral punts that turn over as well as end-over-end kick-offs for coverage and return practice. Plus... it throws both long and short passes for receiving and defensive drills. It will pivot in any direction to challenge the defensive coverage or to instantly throw to an exact location.

The Aerial Attack Football Machine's solid polyurethane throwing wheels firmly grip the ball for an accurate spin. The wheel guards protect arms from potential wheel burns as well as help to keep the wheels as dry as possible in inclement weather.

**Price: \$2,999**

# FOOTBALL MACHINE

## Unique Features

- Universal cradle positions the ball for passing, punting, or kick-offs. (No second cradle required for kick-off.)
- Loosen lever clamp to safely facilitate tilting of wheels to locate and lock throwing head into desired position.
- Two high-powered motors provide instant recovery, allowing rapid repetition and combination of drills. No waiting for wheels to come back up to speed.
- Throwing head pivots instantly in any direction, accurately throwing passes, punts and kick-offs to any location on the field. Operators can lead receivers or spot punts or kick-offs precisely for both returns and coverage. Elevation changes are quick and easy. Machine can also be locked in for precise repetition.
- Unit quickly moves on and off field; just tilt it, unsocket legs and easily roll it on two transporting wheels.
- Controller is accessible, visible and safely away from throwing wheels.
- Throwing wheel guards protect players, coaches, fingers and hands during operation.
- No assembly is required. Unit arrives fully assembled and ready for your immediate use.

## How the Aerial Attack Compares to Our Snap Attack and the Competition

FEATURE	AERIAL ATTACK	SNAP ATTACK	JUGS UNITS
Throwing Distance	5 to 80+ yards	5 to 100 yards	5 to 80 yards
Changing From Right To Left Handed Spirals (and back)	Right -handed spiral only. Instantly change to kick-off mode.	Spring loaded pin instantly locates precise position for exact angle needed (labeled) for right or left handed spirals and kick-offs.	No settings or markings make adjustment random, difficult to find and hard to repeat.
Portability	Two solid wide transporting wheels are always in place ready to roll.	Two solid wide transporting wheels are always in place ready to roll.	Must attach caddy wheels to move unit on and off field.
Wheels	Solid, broad-surface football wheels.	Solid, broad-surface football wheels.	Air pressure tire requires constant attention.
Ball Cradle	Holds ball in position for right-handed spirals and end-over-end. No tools or change of cradle required.	Holds ball in position for both right and left handed spirals and end-over-end. No tools or change of cradle required.	Requires removing spiral slide for end-over end slide. Tools required.
Speed Control	Controls are visible and safely accessible when machine is in operation.	Controls are visible and safely accessible when machine is in operation.	Controls are difficult to see and dangerous to access under spinning wheels.
Safety	Wheels are protected by guards.	Wheels are protected by guards.	Exposed high-speed spinning wheels not protected.
Height Position Changing (from passing to snapping)	N/A	You can change from passing stand to snapping position in seconds. No tools or legs required.	Special legs required (must purchase separately.)
Snapping Position	N/A	Realistic release point low to the ground.	Legs lift release point off of ground.
Accuracy	Exceptional-solid wheels assure repeatability.	Exceptional-solid wheels assure repeatability.	Varied-reliant upon air pressure.
Power	Two direct motors – no power loss from complicated flexible shaft.	Two direct motors – no power loss from complicated flexible shaft.	One motor with flexible shaft.
Use on Carts	Universal cart post clamp available to attach the unit to any cart.	Universal cart post clamp available to attach the unit to any cart.	Can attach to any cart.
Remote Control	No	Yes	Yes
Use with Generator	Yes	Yes	Yes
Locating Pin	N/A	Three precise positions provide realistic spin (right, left, end-over-end).	None
