- Efficiency - Dial-in pitch selection without throwing head adjustments, maximizes practice time
- Transportability - Fits into any compact car, including a Mini Cooper
- Recovery Time - 5 seconds, because of the three wheels, it is almost instant

Taking Training To The Next Level

These two high-quality baseball pitching machines are considered “workhorses” and are used at the professional level all the way down to high school and club programs for both intense batting practice as well as in all defensive drills.

Hack Attack Baseball Pitching Machine

The Hack Attack has a unique three-wheel design that allows you to see the ball clearly and fully all the way through the feeding motion, acceleration and release, just like a live pitcher. It does it all with precision and reliability.

Junior Hack Attack Baseball Pitching Machine

With all of the key features of the Hack, the Junior is lighter weight and more transportable with lower top speeds and is designed to train serious young athletes. This compact, lightweight machine is used at all levels for hitting as well as defensive drills.

Hack Attack/Junior Hack Attack Features

- Pitches include major league fastballs to all right- or left-handed breaking pitches
- Instant fine-tuning between pitches with both elevation and inside/outside adjustments
- Head pivots instantly in any direction for all fungo work

Visit sportsattack.com for more details including comparison charts, manuals, how-to videos and more.

Throwing Head
Mass eliminates recoil, ensuring repeatability

Pitch Selection Chart
Dial locations for the right- & left-hand curveballs, split finger, knuckleballs and fastballs

Pitch Elevation Control
Moves the pitch up and down through the strike zone - location can be changed between pitches

Transporting Wheels
Large extra heavy-duty wheels make rolling machine easy; it is extremely portable

Fungo/Pivot Control
Tightens for pitch repeatability; loosens for fungo work

Inside/Outside Adjustment
Move pitch across width of plate between pitches

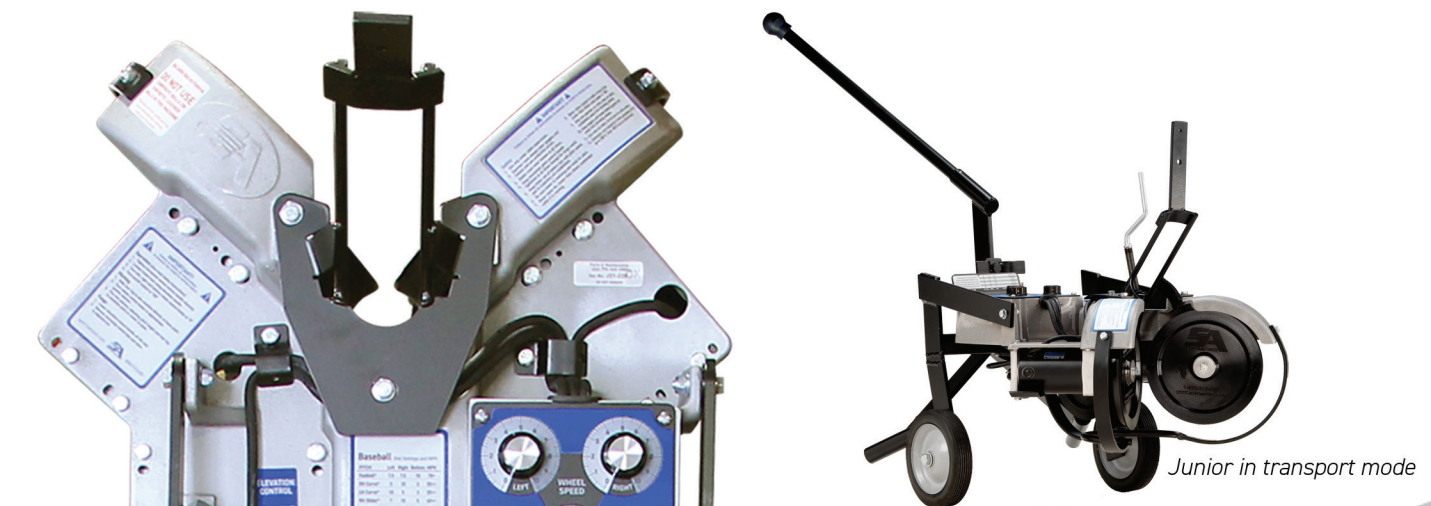

Extra-Wide Tripod Base
Provides stability on all surfaces including mounds

Hack Attack

Sports Attack's Exceptional Training Machine Quality

- Machines are heavy enough to absorb recoil, ensuring accuracy, yet portable and easily moved by one person.
- Extra-wide tripod base insures real stability and safety on mounds or playing surfaces.
- High-tensile, tough heat-treated alloy, weather-resistant aluminum casting throwing head protects throwing mechanism.
- Rugged powder-coated rust-proof steel frame insures limitless seasons of use.
- The throwing wheels out last all other machine wheels and don't melt in direct summer heat. Sports Attack has never replaced a wheel from wear or heat exposure.
- Three powerful variable-speed motors drive three indestructible concave 14" throwing wheels. Almost instant recovery.

Junior Hack Attack
Same features as the Hack

"I train major league hitters using the Junior Hack Attack at a close 33 ft. distance with a small ball coming up at an angle to the hitters at a high speed. The theory being that the hitter would have to focus on the smaller ball, shortening his stroke to get the head of the bat to the ball, eliminating any loop in his bat prior to contact. Hard focus and quick to the ball is the objective."

Joe Maddon, former professional baseball manager & coach
