

VOLLEYBALL

Includes one ball bag

ATTACK FEATURES

- Ball released at realistic angles for spiking, setting and up to 80 MPH serves with precise accuracy and repeatability
- Both vertical and horizontal head movement allows you to instantly throw to any location on the court
- The contoured shape of the two ball-throwing wheels uniformly distribute the contact forces, eliminating the high wear contact points and limiting ball wear
- Moves effortlessly on extra-large rolling wheels and will fit through any standard door

ATTACK SPECIFICATIONS

Speed - 80+ MPH

Ball Release Point - 6' to 9' 3" (over men's & women's net)

Ball Deliveries - Serves, spikes and sets

Wheel Size - 10" diameter, 4" wide (two wheels)

Portability - Quickly rolls around the court or through any standard doorway

Dimensions - 24" wide x 83" to 124" height range x 50" deep (45" w/o throwing head)

VOLLEYBALL

THE ADVANTAGE OF WHEELS

FUNCTION	SPORTS ATTACK WHEEL-PROPELLED MACHINES	AIR-PROPELLED MACHINES
Release Point	Realistic - elevates from 5' to well above men's net, over 9' 3".	Pivots up to only 6' (well below both men's and women's net height).
Speed	Sets to 80 MPH jump serves & everything in between. (Higher release point enables top speeds as ball trajectory does not have to arc to clear net height.)	Sets, tosses and claims "hard" spikes and serves, but no actual speed is stated. (Lower release point requires ball to arc in order to clear net height.)
Feeding and Tempo	Coach can control tempo by feeding continuously or delays. No recovery time is ever needed. The speed, angle and spin are instantly controlled by the coach with each serve, set or spike.	Air-propelled machine can be set to toss up to 1100 balls per hour (one ball every 3.28 seconds). However, recovery time is necessary after rapid fire of 8 -10 balls.
Digging	With the Attack & Attack II the ball is released from above the net, a true downward trajectory at high speeds, providing unmatched spike simulation with realistic reaction time for the ultimate digging drills.	Not capable of delivering a true spike over a regulation net. Spike drill must be performed from same side of net, below net height, severely limiting ball travel distance & player's reaction time.
Serving	Up to jump serve speeds and release point. Breaking top spins and floaters.	No spin limits serve to a simple floater. Low release point requires an arc to clear net & slower speeds to keep in court.
Visibility	Can see the ball from feed to delivery, providing a true sense of timing. True visual timing has to be based on ball movement.	Player's timing must be based on a small light seen from across the court and an unrealistic "buzzer."

SPECIFICATIONS

FEATURE	TOTAL ATTACK	ATTACK	ATTACK II	SKILL ATTACK
Ball Release Point Range	6' 3" to 9' 6"	6' to 9'-3"	5'-6" to 8'-6"	5'-3"
