

# VOLLEYBALL

## SKILL ATTACK FEATURES

- The Skill Attack is the perfect individual volleyball training tool with a ball release point at 5', not floor level like other machines
- Offers a full range of spins to accommodate all drills, from floaters or downspin serves, to setting and spiking drills (from the same side of the net.)
- Both vertical and horizontal head movement allows you to instantly throw to any location on the court
- This small agile unit can easily and quickly be rolled anywhere on the court or in your backyard garage
- Designed for training serious young athletes, individual practice at home, and competitive club or school youth teams

## SKILL ATTACK SPECIFICATIONS

**Speed** - 40+ MPH

**Ball Release Point** - 5' 3"

**Ball Deliveries** - Serves and sets

**Wheel Size** - 5" diameter (two wheels)

**Portability** - Very light and easy to maneuver, breaks down to fit into any car

**Dimensions** - 36" wide x 72" tall x 40" deep

# VOLLEYBALL

## THE ADVANTAGE OF WHEELS

FUNCTION	SPORTS ATTACK WHEEL-PROPELLED MACHINES	AIR-PROPELLED MACHINES
Release Point	Realistic - elevates from 5' to well above men's net, over 9' 3".	Pivots up to only 6' (well below both men's and women's net height).
Speed	Sets to 80 MPH jump serves & everything in between. (Higher release point enables top speeds as ball trajectory does not have to arc to clear net height.)	Sets, tosses and claims "hard" spikes and serves, but no actual speed is stated. (Lower release point requires ball to arc in order to clear net height.)
Feeding and Tempo	Coach can control tempo by feeding continuously or delays. No recovery time is ever needed. The speed, angle and spin are instantly controlled by the coach with each serve, set or spike.	Air-propelled machine can be set to toss up to 1100 balls per hour (one ball every 3.28 seconds). However, recovery time is necessary after rapid fire of 8 -10 balls.
Digging	With the Attack & Attack II the ball is released from above the net, a true downward trajectory at high speeds, providing unmatched spike simulation with realistic reaction time for the ultimate digging drills.	Not capable of delivering a true spike over a regulation net. Spike drill must be performed from same side of net, below net height, severely limiting ball travel distance & player's reaction time.
Serving	Up to jump serve speeds and release point. Breaking top spins and floaters.	No spin limits serve to a simple floater. Low release point requires an arc to clear net & slower speeds to keep in court.
Visibility	Can see the ball from feed to delivery, providing a true sense of timing. True visual timing has to be based on ball movement.	Player's timing must be based on a small light seen from across the court and an unrealistic "buzzer."

## SPECIFICATIONS

FEATURE	TOTAL ATTACK	ATTACK	ATTACK II	SKILL ATTACK
Ball Release Point Range	6' 3" to 9' 6"	6' to 9'-3"	5'-6" to 8'-6"	5'-3"
